

3.1 – PULSED HIP FLEXOR MOBILIZATIONS

<p><u>Purpose</u></p>	<ul style="list-style-type: none"> ▪ To improve length of the hip flexors. ▪ To teach your body the difference between hip extension and lumbar extension.
<p><u>Set-up</u></p>	<ul style="list-style-type: none"> ▪ Set-up with your left knee down on a towel or Airex pad. ▪ Your right leg should be directly in front of the body with your foot flat on the floor. ▪ Make sure that both legs are completely straight and parallel to each other.
<p><u>Performance</u></p>	<ul style="list-style-type: none"> ▪ With the chest up and out, gently brace the core and tense your left glutes to drive your hip forward. ▪ Push to the point where you get a mild stretch in the front of your left hip. ▪ Hold for a two count, and then return to the starting position.
<p><u>Coaching Points</u></p>	<ul style="list-style-type: none"> ▪ Keep the core tight and tense the glutes to get the stretch. Don't extend with your lower back! ▪ Don't worry about your range of motion initially. If you do this properly, you won't need to move much to get a killer stretch.
